LCD PROJECTOR

Spacious, well-lit and well-ventilated classrooms and seminar hall [with ICT] with comfortable seating arrangement are available for smooth conduct of UG and PG theory sessions. Besides the conventional teaching aids, classrooms are also equipped with state-of-the-art audiovisual technology viz. digital smart board, LCD Projectors, thus stepping up the teaching-learning experience to next higher level. Well-thought positioning of aisle in the classroom ensure proper interaction between teacher and students

INDUSTRIAL TRAINING- 04/06/2018-18/06/2018

Industrial training, where a student undertakes a period of training at an organization usually during a semester break, acts as an important part in preparing the student for a professional career. With the actively involved preparation, the student learns about the industrial demands, skill set and work ethics.

Every year students experience industrial training as per the syllabus prescribed in JNTUA and gain knowledge of various departments like Formulation and research department (FR&D) i.e., Manufacturing of Tablets, capsules and injection preparations etc., Quality Assurance, Quality control, Clinical research, Drug regulatory affairs, Hospital Pharmacy etc. as such III year B.Pharmacy students have visited SODUM DRUGS& PHARMACEUTICALS, HYDERABAD, Telangana-500072, India and received hands on experience about industry affairs.

TO WHOM SO EVER IT MAY CONCERN

This is to certify that **Miss.V.BHUVANESHWARI (15ER1R0007)** is a bonafide student of **Dr.K.V. SUBBA REDDY INSTITUTE OF PHARMACY, KURNOOL**. She has undergone industrial training in our organization from **04.06.2018 to 18.06.2018**, as a part of partial fulfillment of her B. Pharmacy course.

During the training, she had interacted with Quality control, Quality Assurance & Production departments and acquired basic knowledge in these areas.

During this aforesaid period, we found her hard working, sincere and learning attitude.

HANDS – ON LEARNING

B. Pharmacy, Pharm.D & Pharm.D (PB) and M. Pharmacy students gain knowledge in theory by taking part in the pragmatic learning in various laboratories located within the institute. Faculty has designed various experiments according to the syllabus assigned by the JNTUA. Students gain practical awareness through live activities and handling the instruments such as Pharmaceutical Analysis instruments operation UV – Visible Spectrophotometry, HPLC, Pharmacology laboratory experiments with animals, and Pharmaceutical Chemistry etc.,

II B.Pharmacy students learning about dissolution in the Pharmaceutics Lab.

I/II Pharm.D students learning about instrumentation at Medicinal Chemistry Laboratory.

ASSIGNMENTS

Assignments are the part of the internal examination evaluation process, in which would be immense value as additional learning instruments. Many types of assignments can be given to students of all such as essays, literature reviews, critical reviews, reflective journals, annotated bibliographies and case studies, depends upon the need and learning situations. It implies a task for students to accomplish the aim of learning particular contents, concepts or relationships etc., in this text, learning assignments involve students' independent information seeking and use of a wide range of information resources which are available for them. So every semester/year students are assigned with 2 or 3 topics per each subject regarding to their syllabus and asked to gather more relevant information. Allotment of marks to students is given according to their task completion. Through this student are enriched with knowledge regarding of topic, proof reading of and presentation techniques.

HUMAN ANATOMY

AND

PHYSIOLOGY

Topic Name : DISORDERS OF HEART [HEART DISEASES]

Submitted by : N. Manoj Kumar

Assignment : 03 18ERI0040

Submitted to : E. Honey Madam

DEPARTMENT OF PHARMACOLOGY

Dr. K.V.S.R. INSTITUTE of Pharmacy

HEART DISEASE :-

It is defined as, "Any disorder that affects the heart". Sometimes the term "heart disease" is used narrowly and incorrectly as a synonym for coronary artery disease.

* Heart disease is synonymous with cardiac disease but not with the cardiovascular diseases.

TYPE OF HEART DISEASES :

1. Arrhythmia
2. Stroke (or) Cerebrovascular accident
3. Angina
4. Myocardial infarction
5. Atherosclerosis
6. Peripheral artery disease
7. Heart failure
8. Cardiac arrest
9. Coronary heart disease
10. High blood pressure.

KURNOOL-518218 (A.P.)

ATHEROSCLEROSIS

A process of progressive thickening and hardening of the walls of medium sized and large arteries as a result of fat deposits on their inner lining.

* It is also called as atherosclerotic cardiovascular disease.

CAUSES

- * The build-up of fats, cholesterol and other substances in and on the artery walls.
- * A build up of cholesterol plaque in the walls of arteries, causing obstruction of blood flow.
- * plaque may rupture, causing artery to clot.
- * High cholesterol.

Symptoms

- * pains occur in the leg while exercising.
- * Erectile dysfunction, Heart Attack.
- * mini strokes
- * poor wound healing.
- * Strokes.

ANGINA:

- * Angina is discomfort or pressure, usually in the chest, caused by a temporarily inadequate blood supply to the heart muscle.
- * Discomfort may also be felt in the neck, jaw, arms.
- * It is also called angina pectoris.

CAUSES :-

* Angina is caused by reduced blood flow to your heart muscle when the heart muscle isn't getting enough oxygen, it causes a condition called ischemia.

* The most common cause of reduced blood flow to your heart muscle is coronary artery disease CAD.

- * Stable angina
- * Unstable angina
- * Prinzmetal angina

RISK FACTORS :-

- Tobacco use
- Diabetes
- High blood pressure
- Older age
- Stress

Symptoms

- chest pain or discomfort, possibly described as pressure, squeezing, burning or fullness.
- pain in your arms, neck, jaw, shoulder or back pain
- Nausea
- Fatigue
- Shortness of breath
- Sweating
- Dizziness

ARRHYTHMIA

It is defined as, irregular beating of heart beats, whether irregular is too fast or too slow. This is known as the Arrhythmia.

CAUSES

- A heart attack that occurring right now
- Scarring of heart tissues from a prior heart attack
- High blood pressure.
- Sleep apnea
- Hyper thyroidism
- Hypo thyroidism

Symptoms

- * pain in chest
- * Dizziness
- * fainting or light-headedness
- * palpitation or slow heart rate
- * shortness of breath

STROKE DISEASE

- * It is also called cerebrovascular accident
- * It is defined as the cause that, it damage to the brain blood vessels from interruption of its blood supply.
- * It stops the blood supply.

INNOVATIVE MODEL MAKING

Students are guided to prepare scientific models through Pharma Expo. The main aim of conducting Pharma Expo is to integrate knowledge within a course, a major, or across an entire Program of study to associate the concepts. This enables students to understand and remember the relationship among various concepts, structures or species.

Model making competition conducted by P.Navya Krishna Department of Pharmaceutical Chemistry in Sep 5th 2019.

PROJECT BASED LEARNING:

Project based learning is a teaching method where students gain knowledge and skill by working for an extended period of time to investigate and respond to an authentic, engaging and complex questions, problems or challenges. It is not only provides opportunities for students to collaborate with or drive their own learning, but also teaches those skills such as problem solving and helps to develop additional skills integral to their future such as critical thinking and time management. So every year IV B. Pharmacy, V year Pharm.D and II year M. Pharmacy students are allotted with a project under the supervision/guidance of faculty to be completed within an academic year. Marks are allotted to projects according to their performance, project results, presentation and viva-voice. Research and review articles of their projects are published by students in various national and international journals.

 DATE: _____

ACKNOWLEDGEMENT

We wish our gratitude to a number of people who made important contributions to the accomplishment of this thesis.

We would be very great pleasure to pay tribute and to thank to Mr. N. BHASKER BABU, M. Pharm, DEPT. OF PHARMACOGNOSY, DR. K. V. Subba Reddy Inst. Of Pharmacy, Dupadu, Kurnool.

We are very grateful to our principal Dr. G. NAGARAJAN, M. Pharm., Ph. D., DEPT. OF P. CHEMISTRY for providing this great opportunity to do our thesis work and helped us in every possible way for completion of this thesis work.

We especially would like to thank Ms. P. Swarnapriya, Assistant professor, for helping us in microbiology department. I would also like to thank all the associate professors.

It is our privilege and a wonderful experience to be a part of this esteemed institution and we would like to express our gratitude to the management including Honorable Chairman DR. K. V. SUBBA REDDY and corresponding K. VIJAYA LAKSHMI, DR. K. VISU PRASEN CH. PHARMACY for providing us all the facilities and support necessary for the dissertation work.

We would like to thank from bottom of our hearts to our parents for the wings they have given us, for having thought us how to soar up into the sky, expand our horizons and brush against the heavens with their showers of blessings and also to all our beloved friends and well wishers for all the loving care and support.

We dedicate this to our parents and our family members, who describe their sufferings and cooperated with us in making this study possible.

Above all, we bow our work to the omnipotent and omnipresent, **THE ALMIGHTY GOD**, who led us to the actualization of this thesis work.

Yours,
 SANJA RAVALI
 SYEDA RUKSANA BEGUM
 SYED FASILLAH HUSSAINI
 SYED MOHIN PASHA

ACKNOWLEDGEMENT

I wish to express our gratitude to a number of people who made important contributions to the completion of this thesis.

We are very grateful to our principal Dr. Nagarajan, M.Pharm., Ph.D., Department of Pharmaceutical Chemistry for providing this great opportunity to do our thesis work and helped us in every possible way completion of this thesis work.

We are very much thankful for the help rendered by our associate professors Dr. B. V. Na, M. Pharm., Ph.D., Department of Pharmaceutics, Mr. R. Jona Methusala, M. Pharm., Department of Pharmacology Mr. N. Bhaskar Babu, M.Pharm., Department of Pharmacognosy. It is a pleasure to convey of gratitude to Dr. Sayeed Basheer, Pharm-D(PB), Assistant Professor, Department of Pharmacy Practice, for his guidance, valuable advice, generosity and continuous help throughout the course of this

privilege and a wonderful experience to be a part of this esteemed institution and we would like to express our gratitude to the management including Honorable Chairman Dr. K. V. Subba Reddy, Independent K. Vijaya Lakshmi, Dr. KVSR institute of pharmacy for providing us all the facilities and support necessary for the dissertation work.

We would like to thank from the bottom of our hearts to our Parents for the wings they have given us, for they taught us how to soar up into the sky, expand our horizons and brush against the heavens with the flowers of blessing and also to all our beloved Friends and well wishers for all the loving care and support.

At all, we bow our work in the feet of the omnipotent and omnipresent the GREAT GOD, who led to the actualization of this thesis work.

Yours,
A. Bhanu Prakash,
M. Goutham Kumar,
N. Sandhya,
S. Keerthi.

ACKNOWLEDGEMENT

I wish to express our gratitude to a number of people who made important contributions to the completion of this thesis.

I am honored, we gratefully acknowledge G. Swetha, M.Pharm., Assistant Professor, Department of Pharmacy, Dr. K. V. Subba Reddy Institute of Pharmacy for her guidance, advice from the early stages of our project work as well as her continuous support, encouragement throughout the work.

We are very grateful to our principal Dr. G. Nagarajan, M.Pharm., Ph.D., Department of Analytical Chemistry for providing this great opportunity to do our thesis work and helped in any possible way for completion of this thesis work.

We are very much thankful for the help rendered by our associate professors Dr. R. V. Uma, M. Pharm., Ph.D., Department of Pharmaceutics, Mr. R. JaganMohanulu, M. Pharm., Mr. Bankar Babu, M.Pharm., Department of Pharmaceutics. It is a great pleasure to convey of gratitude, valuable advice, generosity and continuous help throughout the course of this work. It is privilege and a wonderful experience to be a part of this esteemed institution and we would like to express our gratitude to the management including Honorable Chairman Dr. K. V. Subba Reddy, Professor K. Vijaya Lakshmi, Dr. KVSR Institute of Pharmacy for providing us all the facilities necessary for the dissertation work.

We would like to thank from the bottom of our heart to our Parents for the wings they have given us, for the light as how to soar up into the sky, expand our horizons and break against the heavens with dreams of blessing and also to all our beloved Friends and well wishers for all the loving care and support.

CASE STUDY LEARNING

Case studies are a written description of a real-life problem or situation. Only the facts are provided, usually in chronologic sequence similar to what would be encountered in a patient care setting. The use of cases actively involves the students in the analysis of facts and details of the case in the traditional format called SOAP analysis, by selection of a solution to the problem and defense of his or her solution through discussion of the case details. In the case based learning students use their recall of previously learned information to solve clinical case. The case method is used primarily to develop the skills of self-learning, critical thinking, problem identification, and decision making. Working on subsequent cases with similar problems reinforces information recall. Case studies in the health sciences provides the personal history of an individual patient and information about 1 or more health problems that must be solved. The students work through the facts of the case, analyze the available data, gather more information, develop hypotheses, consider possible solutions, arrive at the optimal solution and consider the consequences of the learner's decisions. The use of the case studies and other active learning strategies will enhance the development of essential skills necessary to practice pharmacy in any setting, including community, ambulatory care, primary care, health systems. Long term care. Home health care, managed care and the pharmaceutical industry.

DELNET

Developing Library Network

JANAL Campus,
Nehru Mandala Road, New Delhi - 110079
www.delnet.in

**Networking Libraries,
Sharing and Spreading Knowledge**

DELNET is a non-profit organization established in 1978. It is a national network of libraries and information centers. It is a member of the International Association of Agricultural Librarians and Documentalists (IAALD) and the International Association of Agricultural Librarians and Documentalists (IAALD).

DELNET MEMBERSHIP

DELNET is open to all libraries and information centers. The membership is divided into three categories: Individual, Institutional, and Corporate.

Individual Membership

Individuals who are interested in library and information science can become members of DELNET. The membership fee is INR 1000 per annum.

Institutional Membership

Institutions such as libraries, information centers, and educational institutions can become members of DELNET. The membership fee is INR 5000 per annum.

Corporate Membership

Corporations and other organizations can become members of DELNET. The membership fee is INR 10000 per annum.

DELNET SERVICES

DELNET provides a wide range of services to its members, including:

- Library development and strengthening
- Information science education and training
- Reference and information services
- Library automation and digital services
- Library management and administration
- Library research and development
- Library evaluation and accreditation
- Library marketing and public relations
- Library preservation and conservation
- Library security and safety
- Library ergonomics and health services
- Library statistics and reporting
- Library benchmarking and quality assurance
- Library innovation and entrepreneurship
- Library leadership and governance
- Library sustainability and social responsibility
- Library ethics and professional conduct
- Library career development and advancement
- Library networking and collaboration
- Library advocacy and public policy
- Library research and innovation
- Library leadership and governance
- Library sustainability and social responsibility
- Library ethics and professional conduct
- Library career development and advancement
- Library networking and collaboration
- Library advocacy and public policy
- Library research and innovation

Group Discussion Session

AY: 2018-2019

Group Discussions help to check students 'interactive skills and how effective they are in communicating with people. The GD is to check how one behave, participate and contribute in a group, how much importance do you give to the group objective as well as your own, how well do you listen to viewpoints of others and how open-minded are you in accepting views contrary to your own.

The aspects which make up a GD are verbal communication, non-verbal behavior, and conformation to norms, decision-making ability and cooperation. The following skills are required in GD

- ◆ Communication Skills
- ◆ Interpersonal Skills
- ◆ Leadership Skills
- ◆ Motivational Skills
- ◆ Team Building Skills
- ◆ Tolerance
- ◆ Clarity over Ambiguity
- ◆ Divergent Thinking
- ◆ Listening skills
- ◆ Presentation Skills
- ◆ Analytical / Logical skills

Topic:

Medicine price control yes or no? A casual debate discuss.

The government controls only those drugs that are considered as life saving and don't have any generic substitutes in market. The Supreme Court has made it clear that they have an appropriate criterion that is followed strictly to keep prices under control. The objective is also to control the pharmaceutical companies who go for higher pricing just to sell their drugs outside India. Even if this move is termed as nationalization of pharma industry, it is ok, because it is the responsibility of government to keep health of citizens as their top priority.

Intentionally the physicians prescribe the patients the expensive drugs that have to be kept in check. The prices of generic drugs available in the India might be cheaper as compared to the international markets but still are considered expensive as per the Indian market.

KURNOOL-518218 (A.P)

NPPA is an organization of the Government of India which was established, inter alia, to fix/revise the prices of controlled bulk drugs and formulations and to enforce prices and availability of the medicines in the country, under the Drugs (Prices Control) Order, 1995.

Drug Price Control Orders (DPCO) are issued under Essential Commodities Act (ECA). Government of India is the issuer of such orders. The drug price control orders enable the government to declare a ceiling price for essential and life saving medicines (as per a prescribed formula). Batch of 18 B.Pharm students attended the session conducted on 19/09/2018

Debate

AY : 2018-2019

Debate is a process that involves formal discourse on a particular topic, often including a moderator and audience. In a debate, arguments are put forward for common opposing viewpoints. Debates have historically occurred in public meetings, academic institutions, debate halls, coffee houses, competitions, and legislative assemblies. Debates has also been conducted for educational and recreational purposes, usually associated with educational establishments and debating societies.

1. Develop excellent oral and written communication skills.
2. Develop excellent critical thinking skills.
3. Develop effective tools for research, organization and presentation.
4. Develop strategies to overcome fears of public speaking.
5. Discover the confidence and desire to participate in all academic classes.

Benefits :

- Confidence - Belief in themselves and their abilities, and the desire to participate in all classes.
- Curiosity - The passion of discovery through effective tools for research, organization and presentation.
- Critical Thinking - How to explore the world through the lens of an inquisitive mind.
- Communication – Oral & written skills and strategies for lively yet respectful discussions & disagreements.
- Control – Eliminate the fears of public speaking.
- Creativity – The desire to explore, create and invent.
- Camaraderie – Meet like-minded peers at tournaments and build healthy bonds of competition.
- Leadership – Self-motivation and the ability to delegate assignments and manage peers.

Debates teaches individuals the importance of being prepared to listen. First, it trains people in the mental preparation of listening – having a listening plan. During a debate you listen for specific things, points you want to answer, weakness in logic, supporting material and key points.

Summary

Using debates in the classroom provides students the opportunity to explore real-world topics and issues. Debates also engage students through self reflection and encourage them to learn from their peers.

Topic: Drug addicts should be punished

where the narcotic drug or psychotropic substance consumed is cocaine, morphine, diacetylmorphine or any other narcotic drug or any psychotropic substance as may be specified in this behalf by the Central Government by notification in the Official Gazette, with rigorous imprisonment for a term which may extend to one year, or with fine which may extend to twenty thousand rupees; or with both; and

where the narcotic drug or psychotropic substance consumed is other than those specified in or under clause (a), with imprisonment for a term which may extend to six months, or with fine which may extend to ten thousand rupees, or with both.

Studies show that drug abuse leads to **poverty and family breakdown**. According to a survey in India, weekly expenditure on drugs amounted to \$13 and total expenditure ranged between US \$250–\$25,000. In families disrupted by drug abuse, poverty is often transmitted from parents to children. A debate **“Drug addicts should be punished”** on was conducted on 24/11/2018 and the students of B Pharmacy have actively participated in this session.

Think Pair Share Session

AY: 2018-19

Think-Pair-Share (TPS) is a cooperative learning activity that can work in varied size classrooms and in any subject. Instructors pose a question, students first THINK to themselves prior to being instructed to discuss their response with a person sitting near them (PAIR).

In other words, Think-pair-share (TPS) is a collaborative learning strategy where students work together to solve a problem or answer a question about an assigned reading. This strategy requires students to (1) think individually about a topic or answer to a question; and (2) share ideas with classmates. Discussing with a partner maximizes participation, focuses attention and engages students in comprehending the reading material.

- It helps students to think individually about a topic or answer to a question.
- It teaches students to share ideas with classmates and builds oral communication skills.
- It helps focus attention and engage students in comprehending the reading material.

VIRTUAL LABS

Virtual labs are used to provide remote access to stimulation based labs in various disciplines of sciences and pharmacy departments. By using these virtual labs to enthuse students to conduct experiments by arousing their curiosity. This would help them in learning basic & advanced concepts through remote experimentation. This would help them to provide complete learning management system around the virtual labs where the students/ teachers can avail the various tools for learning, including additional web resources, video lectures, animated demonstrations and self examinations.
