MANAGEMENT OF VARIOUS TYPES OF WASTE

Bin system is being used in the Institute to separate recyclable waste, as encouraged by Swatch Bharat Mission. On campus, more than 50 dust bins are kept to collect various wastes such as paper, plastics, aluminium cans, food waste, and so on. Every semester, used papers and notebooks are collected for recycling, and unused note books are donated to government schoolchildren for rough use. Laboratory waste, including hazardous chemicals, is disposed of. A certified third party collects and disposes of this waste. The use of radiation materials inside the laboratory is strictly prohibited by the institution. The campus follows the Andhra Pradesh Government's recommendation and does not use plastic cans or cups.

Solid Waste Management:

Housekeeping staff collects solid waste from class rooms and hostel rooms in separate containers each morning and dumps it at the waste yard labelled as the garbage collection pit at the far end of campus. Dry waste, including paper and plastics, is separated and transported in vans. Dry/ recyclable waste is collected in separate garbage cans in laboratories, libraries, and classrooms, among other places. Wet waste is recycled along with cafeteria waste for soil manure/fertilizers after being processed in a pit specifically designed for this purpose.

Plastic ban:

Our college campus is divided into two blocks, each with three floors. Each floor has two bins for organic and inorganic waste disposal. Plastic-free warning signs are posted throughout campus. Furthermore, security is notified to prevent the entry of plastics onto campus. All such usage is monitored in the cafeteria and hostel rooms, and every effort is made to eliminate all forms of plastic on campus. Students and faculty are encouraged to use paper bags. **Liquid**

All such usage is monitored in the cafeteria and hostel rooms, and every effort is made to eliminate all forms of plastic on campus. Students and faculty are encouraged to use paper bags.

Liquid waste management:

Our institution is taking serious initiatives to reduce liquid wastes to avoid water scarcity inside the campus.

Waste water from kitchen

Reject waste water from RO plants

Distilleries waste

E-waste management:

There is a simple e-waste management process in place at the institution. When a computer's useful life is up, designated technicians collect it from various locations around campus and transport it to the institution's computer centre. The computers are sometimes repaired at the centre, and some are likely not repaired due to the level of damage. The condemned batteries are replaced with new ones. Some broken computer components are being used to teach students about computer internal peripherals. During the practical sessions, the students can inspect and reassemble the electronic and electrical equipment that is being repaired.

The authorised agencies collect the institute's e-waste and reuse it for useful components.

Divyangjan Policy Document

Institute does not have any student till now who are differently abled (Divyangjan) so right now the Institute is just providing physical facilities like ramp, rest rooms.

If any student (Divyangjan) is admitted in the future then our management is ready to provide the facilities like provision for lift, Braille software/facilities, etc.

Subramani
