Best practice: 1

1. Title : Skill enhancement Initiatives for Staff and Students

Skill Development Programmes contribute to constant updation of knowledge and enrichment of practical skills. This process of updation is a continuous one, which aims at the growth of the individual, institution and society at large. This is an era in which Smart Work has more validity than hard work. Thanks to Globalization and the explosion in the field of ICT which have made acquiring of new skills and knowledge obligatory. Training programmes for both staffs and students make them updated and cater to the demands in the highly competitive job market, and industries.

2. Objectives:

The primary objectives for offering various training programmes are to

a) Teachers:

- keep abreast with new technologies in frontier areas of teaching and research
- make optimum use of ICT in teaching-learning
- develop innovative teaching pedagogies and evaluation methods
- enhance research potential and quality of research

b) Students:

- To provide adequate training in respect to the major subject for enhancing more skills.
- It also aims to create opportunities for the development of talent and improve their overall personality.
- To improve students' technical skills and engaging themselves in the current scenario
- face interviews and competitive examinations with confidence
- become socially responsible citizens

3. The Context:

The prime objective of the New Education Policy (2017) is to "make India a knowledge superpower by equipping its students with the necessary skills and knowledge". Teaching Staffs, Non-teaching faculty and students, have to be properly trained at regular intervals to keep them updated with new

age has compelled us to move towards OBE (Outcome Based Education). At the end of the programme, the students are expected to possess skills and knowledge on par with the demands of the challenging job market. Lack of training leads to unskilled labour and in turn may result in unemployment and underemployment. We need to collaborate with the industries and experts in new frontiers of research to customize the curriculum accordingly.

4. The Practice:

- Teaching Faculty: Faculty Development/Enrichment Programmes for Staffs are organized at constant intervals
- The college takes excellent efforts to increase their academic eligibility. The institution takes round the year efforts for improving their academic performance and interpersonal skills of the students, to development these skills institution organizes various activities.
- Accordingly, a dedicated students skill development cell was established in the year 2017. The main objective of the skill development cell is to bridge the gap between academia and industry and train the students on the required skill sets.
- The students are trained on Employability Skills which are required for the industry. The students are trained from First year to final year as per the requirement.
- The institute has tie-up with various agencies & trainers for the specific training programs for the students. These agencies train the students on the areas like Aptitude Skills, Soft Skills, Technical Training, Resume building, Mock Interview, various guest lectures, sessions on the various topics. These trainers train the students from First year to final year students.
- Apart from the regular classes, students are also provided industry ready training for 15 days on the students requirements. The impact of this shown a gradual increase in the placements due to persistent efforts in preparing and training the students for employability.
- Many of our students before they graduate, they get job offers from the companies of repute like, Mediasist, Wipro, Hetero Labs ,Cognizant, etc. There are several students who opt for the internship , the students who don't have a clear idea of how to get the internship and various assessment processes. Hence, the student skill development cell assist such students to go through the process and help them to attend and clear the interview Through various assessments and surveys to identify gaps and offer

Best Practice 2

1. Title of the Practice: Comprehensive & Continuous Student monitoring system

2. Objective of the Practice:

Objectives of this practice are

- ✓ Understanding and solving the problems of students and improving their quality of life.
- ✓ Guiding the students to choose better career path for job, higher studies Entrepreneurship, etc.
- ✓ Strengthening of teacher-student relationship.
- ✓ To identify any deficiencies in the academic and physical infrastructure and in student services from the perspective of the students can be gained for the purpose of quality enhancement and development.
- ✓ To strengthen the student-teacher synergy in the process of quality enhancement in higher education.

3. The Context:

- ✓ To mould the students to compete in the challenging global environment.
- ✓ The practice focuses on addressing of conflicts in attitudes, habits, and learning practices.
- ✓ Need for better coordination of lectures, tutorials and practical classes.
- ✓ To promote collaborative studies among small groups of students.

4. The Practice:

A mentor is a personal mentor and counselor for a student during the duration of stay at the Institute. A mentor represents a parent away from home for a student, and is the first point of reference for the activities of a student during the complete course of study at the institute. As soon as a student enters the institute, a faculty member is assigned to take over the role of a mentor for the student. The mentor not only guides the student in

E-mail : principalkvsrip@gmail.com www.drkvsrip.ac.in

Principal / Correspondent

Date :

The students meet their mentors regularly. However, depending on the need, mentor conducts more meetings with their students and their parents. The mentor educates the student about the various course requirements, such as the mandated minimum and maximum course load every semester, and how to choose electives. The mentor helps the student channel their interests and energies effectively during the complete course of study at the institute. The students meet their mentors for various reasons, some students would like extra help with the material in a course and are shy to approach a new instructor assigned to the course. Few might be facing problems adjusting to the new environment may be in the hostel or at other places around the institute; some others would like to know about their options of availing various resources at the institute. Students would like to know about their options for going through internships during the break or even the benefits of the same, few might want to do some minor project work or participate in various competitions in addition to their courses, some other might want to know their options after graduation and how to figure out where they would fit in better. At times the students might just need someone who can give them personal time and attention by listening to their struggles in transitioning to a higher education environment and finally in becoming a constructive member of society

5. Evidence of Success:

- ✓ Student's attendance had improved after counseling by the mentors.
- ✓ The direct communications between mentor and students have improved the teacher student relationship
- ✓ Academic performances of the students have improved.
- ✓ Participation in extra-curricular activities has been enhanced.
- ✓ Students become more disciplined.
- ✓ Students maintain harmonious relationship among themselves

6. challenges:

Students often find it difficult to meet their mentors due to the hectic academic schedule. To address this common free slots in the time table are provided wherever possible. As some of the faculty members have no expertise in counseling, an intensive training is required. In this regard assistance is being provided by department heads and senior faculty members.
